

Liquid machine dishwash detergent with built-in rinse-aid

Description

Suma Combi+ LA6 uses new innovative technology to combine a concentrated liquid mechanical ware washing detergent and rinse aid in one. It is specially formulated to provide soil removal for up to 12°dH, 21°FH or 215ppm water hardness conditions.

Key properties

Suma Combi+ LA6 is a heavy duty alkaline liquid detergent and rinse aid all in one, which is suitable for use in a wide range of single tank or front loader washing machines (no conveyor or multi-tank). It contains a blend of caustic alkali and scale control agents, which will provide soil removal. The high level of powerful scale control agents will also prevent scaling for up to 12°dH, 21°FH or 215ppm water hardness conditions. Because of the unique innovative rinse aid additive changing the behavior of the water there is no need for a separate rinse aid.

Benefits

- New innovative technology provides a detergent and rinse aid all in one product
- Ensures quick drying
- Cuts through grease and dried-on food
- Highly concentrated formulation gives economy in use
- Prevents scaling of the dish wash machine
- Gives streak and spot-free results
- Chlorine free
- Phosphate free

Use instructions

Suma Combi+ LA6 is normally applied using Diversey automatic dispensing equipment. However, it can be used in conjunction with an integral dosing pump. To ensure perfect cleaning results in up to 12°dH, 21°FH or 215ppm water hardness conditions, use the minimum recommended dosing of 0.4ml/l*, depending on local site conditions.

At 2ml/l, this will prevent scale deposits in water containing up to 215ppm CaCO₃, 12°dH, 21°FH. Actual dosage will depend on site conditions (water hardness, degree of soiling, procedures).

The product is not suitable for systems where currently an acidic rinse aid is used as a descaler, and where a detergent to rinse aid dosage is below 2:1.

At first use, rinse pump, and transport tubes of the dosing system to avoid possible crystallization in these tubes caused by mixing of products, and empty the rinse line.

Technical data

Appearance: clear yellow liquid

pH value (1% solution): 12.5

Relative density: 1.24

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; sds.diversey.com.

Store in original closed containers away from extremes of temperature.

Only for professional users / specialists.

Product compatibility

Under recommended conditions of use, Suma Combi+ LA6 is suitable for use on most materials commonly encountered in the kitchen. Do not use on alkali sensitive items such as copper, brass, aluminium or rubber.
